| Tip                                               | Why                               |
|---------------------------------------------------|-----------------------------------|
| Take rings off for gym, cleaning and gardening    | Prevents scratches and bent bands |
| Clean with warm water, mild soap and a soft brush | Removes build-up behind stones    |
| Store separately in a soft pouch                  | Stops rings scratching each other |
| Check claws once a year                           | Loose settings can lose stones    |
| Resize with a jeweller                            | Keeps the ring round and strong   |
